

Mitchell Pool

Published on City of Great Falls Montana (<http://www.greatfallsmt.net>)

Mitchell Pool

Mitchell Pool is the largest, heated, public, outdoor pool in Montana. The pool's "L" shape comes from the combination of a competition-sized pool and a deep-water extension. Two enclosed slides drop into the deep water, and the pool also serves as the "splash zone" for the Power Tower water slides.

Spending a day at "the Mitchell" is spending the day in classic Electric City Style! A cool-water summer-haven, the current pool is the latest in a series of pools that have been located on the site since the original pool was built in 1934.
