

River's Edge History Tour

The River's Edge History Tour provides a look at the pre-history and historical resources along the Missouri River corridor. The approximately five mile section of the river will take about two hours if you are walking the River's Edge Trail for the entire distance. There are numerous access points along trail, and the Lewis & Clark Interpretive Center, the Fish Wildlife & Parks Visitor Center and Giant Springs State Park also offer parking and other public facilities. The history tour is great companion piece for the [River's Edge Trail Map](#).
